

2014 Lecture Series

Salish Sea Oceanography and Marine Ecosystem

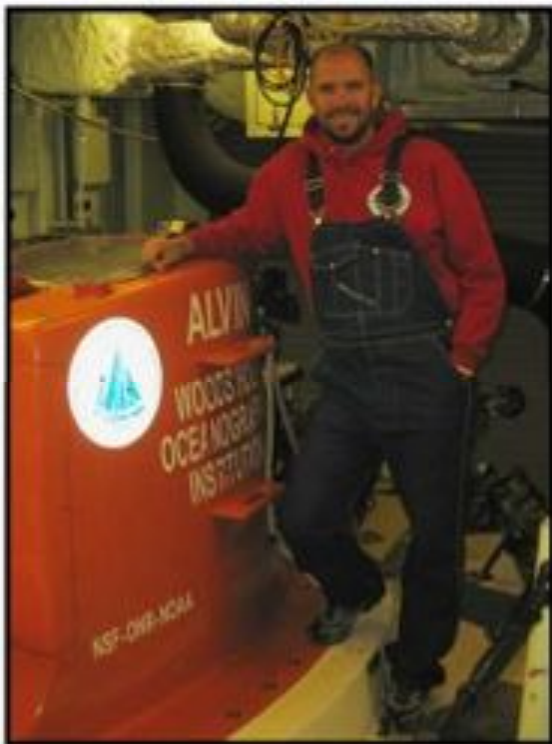

Stressors: Partners in a Changing Marine Landscape

March 14th 7-8:30 pm

Northwest Educational Service District Building

1601 R Ave, Anacortes

M. Brady Olson, Ph. D., Marine Scientist
Western Washington University
Shannon Point Marine Center

Chemical, physical and geological processes operating in the Salish Sea create a biologically rich and productive ecosystem. These processes combine with environmental stressors such as ocean acidification and low oxygen levels to make the Salish Sea a bellwether for climate change.

Join Dr. M. Brady Olson, Marine Scientist at WWU Shannon Point Marine Center to explore the details.

Lectures are free and open to the public.

Sponsored by Friends of Skagit Beaches
